PALIRETREAT.COM

The safety of our guests while here at Pali Retreat is our number one priority. We will always be following the guidance issued by the San Bernardino County Health Department / CDPH and American Camp Association (ACA). The COVID19 guidance and requirements change frequently. We will review any updates as timely as possible and if applicable to our organization, make any necessary adjustments to this policy. The ongoing safety of our guests is our main priority while doing our absolute best to provide exceptional service and a delightful visit.

## COVID Testing/Screening

- Pali strongly recommends groups to require proof of a negative COVID19 test for each guest 3-days (72 hours) before the arrival date for guests who are not vaccinated against COVID19.
- Groups will be required to take the temperature of every guest attending Pali prior to leaving for camp.
- Staff are fully vaccinated (and/or tested weekly) but will also be screened for temperature and symptoms on arrival.

## Masks

- Masks will be required while in the dining hall away from the assigned tables.
- If weather requires any activity to be moved indoors, masks will be required.
- Masks are not required while students are in their assigned cabins.

## Cleaning and Hygiene

- We have increased our already thorough sanitization standards to exceed recommendations by the CDC.
- Cabins and meeting spaces are sanitized daily and deep cleaned after each visit.
- The dining hall is sanitized 3 times daily.
- All activities will take place outdoors; weather permitting.
- Hand washing will be required before meals and after using the restroom as well as encouraged throughout the day as much as possible.

## Limiting Interactions

- Each group will have an assigned section of the dining hall.
- Cabins and meeting spaces are assigned to groups and used only by those guests.
- Classroom materials and other equipment are sanitized after each use.
